Assessment Manager Mechanical Calibration

Competitive salary + benefits – UK Home or Office Based

UKAS is looking for an Assessment Manager to be responsible for laboratory assessment primarily for hardness, mass and torque calibration but also some mechanical testing, to lead assessment visits, make technical appraisals and to implement accreditation policy.

The applicant will

- Have a number of years laboratory practical experience
- Be educated in, and experienced with technical measurement issues in laboratories
- Have detailed technical expertise in mechanical calibration
- Exhibit excellent interpersonal skills, being able to communicate effectively with laboratory staff and management and their customers at all levels
- Have a keen interest in sound metrology and its dissemination

The successful applicant will be responsible for managing the assessment of laboratories and inspection bodies throughout the UK and will appoint assessment teams, lead and participate in assessment visits and provide support on both technical and policy issues. This position requires travel mainly within the UK with some overnight stays.

If you would like to discuss the details of this vacancy please contact John Cubis on 020 8917 8468 or email john.cubis@ukas.com

For more information about UKAS and to download an application form please visit our website at www.ukas.com. Please post documents to the HR Manager at UKAS, 21-47 High Street, Feltham, Middlesex, TW13 4UN, Fax: 020 8917 8663 or Email: humanresources@ukas.com

The United Kingdom Accreditation Service (UKAS), a company limited by guarantee, is the sole body recognised by Government to assess and accredit the competence of laboratories, certification bodies and inspection bodies.
