Locations where certification activities covered by the above Accreditation Standard are undertaken	
Insight Certification Limited Trading as National Security Inspectorate and CerticCS Sentinel House 5 Reform Road Maidenhead SL6 8BY United Kingdom	

Flexible Scope

The flexible scope enables the Certification Body to include certification for the same or similar schemes against standards that are not specifically listed in this Schedule, providing that:

- new revisions of product standards (where the product standard is already included in the Insight Certification Limited scheme and the changes do not affect the technical requirements of the scheme and/or the competence requirements)
- new standards, or codes, that are technically equivalent to the standards/codes of practice already included under Insight Certification Limited's accredited scope and where competence requirements for the new standard have already been demonstrated.

The flexible scope is managed through in-house procedure OP1-180 and the list of standards implemented under flexible scope are detailed in the Insight Certification NSF 161 Flexible Scope Usage Register V2 dated May 2021

Information about flexible scopes of accreditation is available in UKAS document GEN 4
