	Test protocol for residential occupancies for automatic nozzle systems	BS EN 14972-17: 2025	Carrickfergus

### **\*\*Appendix - BS EN 13501 Fire Classification Requirements**

#### **Introduction**

The definitive statement of the accreditation status of a testing laboratory is the accreditation certificate and the associated schedule of accreditation. This schedule of accreditation is a critical document, as it defines the extent of the activities for which the organisation holds accreditation.

#### **BS EN 13501 Fire Classification Requirements**

Such classifications shall be based on a recognised Direct Field of Application (DIAP) or Extended Field of Application (EXAP) that refers to a standard prepared by or approved by CEN/TC 127 "Fire safety in buildings" or a product standard which includes full information on testing to support the EXAP.

The schedule entry does not cover any expert judgements (i.e. an opinion that is not considered/covered by an EXAP standard and/or is only based on the experience of an individual(s)).
