DETAIL OF ACCREDITATION

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
HUMAN BODY TISSUE AND FLUIDS Ocular Pathology samples (eye lids, conjunctiva, cornea, lacrimal sac, lacrimal gland, orbit, intra-ocular structures, sclera / choroid, enucleations, eviscerations, exenterations)	<u>Histopathology</u> Examination of tissues to identify or exclude morphological and cytological abnormalities for the purposes of diagnosis	Macroscopic and Microscopic examination In house documented procedures in conjunction with equipment as specified below: <u>Specimen dissection</u> Manual methods using documented in-house procedure PREP-003

8609 **Accredited to ISO 15189:2022**	**Schedule of Accreditation** **issued by** **United Kingdom Accreditation Service** 2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK **Moorfields Eye Hospital NHS Foundation Trust** **Issue No:** 007 **Issue date:** 17 June 2026

Testing performed at main address only

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
HUMAN BODY TISSUE AND FLUIDS	Cytopathology:	
Vitreous fluids & corneal impression drum	Examination of tissues to identify or exclude morphological and cytological abnormalities for the purposes of diagnosis	
		Preparation of slides for staining: Documented in-house procedure PREP015 in conjunction with manufacturers instructions using Hettich Rotofix centrifuge
	Examination of slides to identify or exclude morphological and cytological abnormalities for the purposes of diagnosis:	Staining: Documented in-house procedures for manual staining using the following stains with reference to:
Vitreous fluids	Basic cellular components	H&E
	Cytopathology	
Slides prepared in-house as above	Morphological assessment and interpretation / diagnosis	Microscopy and reporting using documented in-house procedure G001
