

Technical Bulletin – Important information for Certification Bodies regarding migration to ISO 45001

30 January 2020

Following discussions at the IAF Technical Committee, and with the migration process for ISO 45001:2018 now in its closing stages, IAF has confirmed the following to be observed by certification organisations.

The end date for the migration period is **31 March 2021** (*last day of the month*) in accordance with a previous general IAF decision. The end of the migration period for Certification Bodies remains unchanged as **12 March 2020**.

CBs can include on certificates that the client was previously certified to OHSAS 18001. However, this has to be a note separate to the ISO 45001 certificate date; e.g. the certificate can read: *ISO 45001 issued 10 Jan 2020* - with a note below stating *previously certified to OHSAS 18001 since*

Should you require any clarification on the above, please contact one of the following:
