### Furness Controls Limited

Issue No: 045

Issue date: 26 May 2023

Beeching Road  
Bexhill  
East Sussex  
TN39 3LG

Contact: Mr Ian Clarke  
Tel: +44 (0)1424-819980  
E-Mail: [calibration@furness-controls.com](mailto:calibration@furness-controls.com)  
Website: [www.furness-controls.com](http://www.furness-controls.com)

Calibration performed by the Organisation at the locations specified below

#### Locations covered by the organisation and their relevant activities

##### Laboratory locations:

Location details	Activity	Location code
<b>Address</b> Beeching Road Bexhill East Sussex TN39 3LJ  <b>Local contact</b> Ian Clarke	<a href="#">Flow calibration</a> <a href="#">Pressure calibration</a> <a href="#">Electrical Calibration</a>	Perm
Techniparc 3 rue Boole 91240 St. Michel sur Orge France  Thierry Jéhanno Tel.+33 1 69460020	<a href="#">Flow calibration</a> <a href="#">Pressure calibration</a> <a href="#">Electrical Calibration</a>	France and site
Furness Controls GmbH Halskestraße 23 D - 47877 Willich Germany  Karsten Bartsch Tel. +49 21 54 49 96 80	<a href="#">Flow calibration</a> <a href="#">Pressure calibration</a> <a href="#">Electrical Calibration</a>	Germany and site

##### Site activities performed away from the locations listed above:

Location details	Activity	Location code
The customer's site or premises must be suitable for the nature of the particular calibrations undertaken and will be the subject of contract review arrangements between the laboratory and the customer  <b>Site contact:</b> Sarah Hedge 4 The Pavilions Amber Close Tamworth Staffordshire B77 4RP  Tel: +44 (0)1827 59950	<a href="#">Flow calibration</a> <a href="#">Pressure calibration</a>	Site

<b>ELECTRICAL</b>				
DC Voltage Measurement	0 V to 11 V 11 V to 55 V	Q [ 0.0035 %, 30 $\mu$ V ] Q [ 0.0035 %, 300 $\mu$ V ]		Perm France Germany
DC Current Measurement	0 A to 110 mA	Q [ 0.010 %, 1.0 $\mu$ A ]		Perm France Germany
RESISTANCE Measurement	0 $\Omega$ to 11 k $\Omega$	Q [ 0.015 %, 5.0 m $\Omega$ ]		Perm France Germany

Calibration methods:

Pressure and flow calibrations of devices with an electrical output may be undertaken at all sites.

Pressure calibration are undertaken by comparison with either a pressure generator or indicator.

Flow calibrations are performed under steady conditions for items connected in series with a reference standard.

Electrical calibrations are performed by direct comparison with reference device.

**Appendix - Calibration and Measurement Capabilities**

**Introduction**

The definitive statement of the accreditation status of a calibration laboratory is the Accreditation Certificate and the associated Schedule of Accreditation. This Schedule of Accreditation is a critical document, as it defines the measurement capabilities, ranges and boundaries of the calibration activities for which the organisation holds accreditation.

**Calibration and Measurement Capabilities (CMCs)**

The capabilities provided by accredited calibration laboratories are described by the Calibration and Measurement Capability (CMC), which expresses the lowest measurement uncertainty that can be achieved during a calibration. If a particular device under calibration itself contributes significantly to the uncertainty (for example, if it has limited resolution or exhibits significant non-repeatability) then the uncertainty quoted on a calibration certificate will be increased to account for such factors.

The CMC is normally used to describe the uncertainty that appears in an accredited calibration laboratory's schedule of accreditation and is the uncertainty for which the laboratory has been accredited using the procedure that was the subject of assessment. The measurement uncertainty is calculated according to the procedures given in the GUM and is normally stated as an expanded uncertainty at a coverage probability of 95 %, which usually requires the use of a coverage factor of  $k = 2$ . An accredited laboratory is not permitted to quote an uncertainty that is smaller than the published measurement uncertainty in certificates issued under its accreditation.

**Expression of CMCs - symbols and units**

It should be noted that the percentage symbol (%) represents the number 0.01. In cases where the measurement uncertainty is stated as a percentage, this is to be interpreted as meaning percentage of the measurand. Thus, for example, a measurement uncertainty of 1.5 % means  $1.5 \times 0.01 \times q$ , where  $q$  is the quantity value.

The notation  $Q[a, b]$  stands for the root-sum-square of the terms between brackets:  $Q[a, b] = [a^2 + b^2]^{1/2}$
