

# Schedule of Accreditation

issued by

## United Kingdom Accreditation Service

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

 <b>0617</b>  Accredited to <b>ISO/IEC 17025:2017</b>	<b>LTE Scientific Ltd</b>	
	Issue No: 016    Issue date: 20 August 2021	
	Greenbridge Lane Greenfield Oldham Lancashire OL3 7EN	Contact: John Cruse Tel: +44 (0)1457 876221 Fax: +44 (0)1457 870131 E-Mail: J.cruse@lte-scientific.co.uk Website: www.lte-scientific.co.uk
Calibration performed by the Organisations at the locations specified below		

### Locations covered by the organisation and their relevant activities

#### Site activities performed away from the locations listed above:

Location details	Activity	Location code
Customer Premises, eg, Hospitals, Laboratories, and Manufacturing Plants (*including those of LTE)	Temperature (Sterilizers etc, and Thermal Products) Pressure Time	S

0617  
Accredited to  
ISO/IEC 17025:2017

**Schedule of Accreditation**  
issued by  
**United Kingdom Accreditation Service**  
2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

**LTE Scientific Ltd**  
**Issue No: 016 Issue date: 20 August 2021**

Calibration performed by the Organisation at the locations specified

Calibration and Measurement Capability (CMC)

Measured Quantity Instrument or Gauge	Range	Expanded Measurement Uncertainty ( $k = 2$ )	Remarks	Location Code
<b>TEMPERATURE</b>  Temperature controlled autoclaves, media preparators, incubators, sterilizers, ovens, environmental cabinets, and liquid baths (inclusive of associated indicators, controllers and recorders, all with sensors, within the specified parameters and ranges).	0 °C to 140 °C 140 °C to 250 °C	0.63°C 1.2 °C	A list of individual approved engineers is held by the laboratory and by UKAS.  Single and multipoint monitoring probes. Time dependent temperature profiling.	S
<b>TIME INTERVAL</b>  Timers	30 s to 3600 s	4.0 s	Calibrated with a reference timer	S
<b>PRESSURE</b>  Gas pressure (gauge)	- 0.9 kPa to 300 kPa	6 kPa	Calibration with a digital pressure indicator.	S
Gas pressure (absolute)	0.1 kPa to 400 kPa	6 kPa		
END

Calibration performed by the Organisation at the locations specified

**Appendix - Calibration and Measurement Capabilities**

**Introduction**

The definitive statement of the accreditation status of a calibration laboratory is the Accreditation Certificate and the associated Schedule of Accreditation. This Schedule of Accreditation is a critical document, as it defines the measurement capabilities, ranges and boundaries of the calibration activities for which the organisation holds accreditation.

**Calibration and Measurement Capabilities (CMCs)**

The capabilities provided by accredited calibration laboratories are described by the Calibration and Measurement Capability (CMC), which expresses the lowest measurement uncertainty that can be achieved during a calibration. If a particular device under calibration itself contributes significantly to the uncertainty (for example, if it has limited resolution or exhibits significant non-repeatability) then the uncertainty quoted on a calibration certificate will be increased to account for such factors.

The CMC is normally used to describe the uncertainty that appears in an accredited calibration laboratory's schedule of accreditation and is the uncertainty for which the laboratory has been accredited using the procedure that was the subject of assessment. The measurement uncertainty is calculated according to the procedures given in the GUM and is normally stated as an expanded uncertainty at a coverage probability of 95 %, which usually requires the use of a coverage factor of  $k = 2$ . An accredited laboratory is not permitted to quote an uncertainty that is smaller than the published measurement uncertainty in certificates issued under its accreditation.

**Expression of CMCs - symbols and units**

It should be noted that the percentage symbol (%) represents the number 0.01. In cases where the measurement uncertainty is stated as a percentage, this is to be interpreted as meaning percentage of the measurand. Thus, for example, a measurement uncertainty of 1.5 % means  $1.5 \times 0.01 \times q$ , where  $q$  is the quantity value.

The notation  $Q[a, b]$  stands for the root-sum-square of the terms between brackets:  $Q[a, b] = [a^2 + b^2]^{1/2}$
