Flexible Scope

For the areas of the schedule marked with * and listed below only the laboratory is accredited to ISO/IEC17025:2005 for testing activities in accordance with the standards in the schedule. This may also include tests on the same or similar product types against standards, or customer-specified methods, that are not specifically listed in this Schedule, providing that:

- (1) The method or standard does not introduce new principles of measurement.
- (2) The method or standard does not require measurements to be made outside the parametric boundaries defined in this Schedule.

Information about flexible scopes of accreditation is available in UKAS document LAB39/EA2/15 and ILAC G18

Types of tests where the flexible scope applies

Light fastness
Weather Fastness
