<p>Testing performed by the Organisation at the locations specified below</p>		

CET Infrastructure Division (A Division of CET Structures Limited) is accredited for a flexible scope that enables them to establish site laboratories to conduct the activities detailed below, in accordance with their documented in-house procedure: Laboratory Quality Manual Section 25 - These activities are identified by the current location code for operating site laboratories. Note: FLEX (Site) = Sampling or testing activities which can be performed at any location, FLEX (NCL) = No current location

Current locations covered by the scope of accreditation:

DETAIL OF ACCREDITATION

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used	Location Code
Permanent Locations			
AGGREGATES	Sampling coarse, fine and all-in aggregates - from heaps	BS 812-102:1989	S
	Sampling - from stockpiles	BS EN 932-1:1997	S
	Methods of reducing laboratory samples - using a riffle box - reduction by quartering - to a test portion of a specified mass within a small tolerance	BS EN 932-2:1999	A,D
	Particle size distribution - washing and sieving	BS 812-103:Section 103.1:1985	A,D
	Particle size distribution - dry sieving	BS 812-103:Section 103.1:1985	A,D
	Moisture content - oven drying method	BS 812-109:1990	A,D
	Particle size distribution - sieving method	BS EN 933-1:2012	A,D
	Flakiness index	BS EN 933-3:2012	A
	Shape index	BS EN 933-4:2000	A
	Percentage of crushed and broken surfaces in coarse aggregate particles	BS EN 933-5: 1998	A
Constituents of coarse recycled aggregate - Test for geometrical properties of aggregates.	BS EN 933-11:2009	A,D

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

CET Infrastructure Division (A Division of CET Structures Limited)

Issue No: 066 Issue date: 08 April 2019

Testing performed by the Organisation at the locations specified

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used	Location Code
AGGREGATES (cont'd)	Micro-Deval coefficient	BS EN 1097-1:2011	A
	Resistance to fragmentation of coarse aggregate - Los Angeles method	BS EN 1097-2:2010	A,
	Resistance to fragmentation of aggregates for railway ballast by the Los Angeles test method	BS EN 1097-2:2010	A
	Micro-Deval coefficient	BS EN 13450:2013 (BS EN 1097-1:2011)	A
	Resistance to fragmentation of coarse aggregate - modified Los Angeles method	BS EN 13450:2013 (BS EN 1097-2:2010)	A
	Loose bulk density and voids	BS EN 1097-3:1998	A
	Water content - drying in a ventilated oven	BS EN 1097-5:2008	A,D
	Particle density and water absorption - wire basket method for aggregate particles between 31.5 and 63 mm	BS EN 1097-6:2013	A
	Particle density and water absorption - pyknometer method for aggregate particles between 4 mm and 31.5 mm	BS EN 1097-6:2013	A
Particle density and water absorption - pyknometer method for aggregate particles between 0.063 mm and 4 mm	BS EN 1097-6:2013	A

Issue No: 066 Issue date: 08 April 2019

Testing performed by the Organisation at the locations specified

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used	Location Code
BITUMINOUS MIXTURES for roads and other paved areas	Sampling from - from around the augers of the paver - from workable material in heaps - coated chippings from stockpiles - finished material - core cutting method	BS EN 12697-27:2001	S
	Soluble binder content by difference, using bottle rotation machine and pressure filter	BS EN 12697-1:2012	A,
	Soluble binder content by recovery, using bottle rotation machine, bucket centrifuge type 1 and volume calculation	BS EN 12697-1:2012	A
	Particle size distribution	BS EN 12697-2:2002	A
	Maximum density - volumetric procedure	BS EN 12697-5:2009 incorporating corrigendum February 2012	A
	Bulk density - saturated surface dry (SSD)	BS EN 12697-6:2012	A
	Air voids content	BS EN 12697-8:2003	A
	Conventional refusal density - vibratory compaction	BS EN 12697-9:2002	A
	Percentage refusal density (PRD) - vibratory compaction	BS EN 12697-9:2002	A
	Preparation of samples for the determining binder content, water content and grading	BS EN 12697-28:2001	A

ISO/IEC 17025:2005

Schedule of Accreditation

issued by

United Kingdom Accreditation Service

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

CET Infrastructure Division (A Division of CET Structures Limited)

Issue No: 066 Issue date: 08 April 2019

Testing performed by the Organisation at the locations specified

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used	Location Code
SOILS for civil engineering purposes (cont'd)	Dry density/moisture content relationship (vibrating hammer)	BS 1377-4:1990	FLEX (NCL)
	MCV - natural moisture content	BS 1377-4:1990	Z
	MCV/moisture content relation	BS 1377-4:1990	Z
	Chalk crushing value	BS 1377-4:1990	FLEX (NCL)
	In-situ density - sand replacement method (large pouring cylinder)	BS 1377-9:1990	Z
	Dynamic cone penetrometer	Documented In-House Method STP S9 based on manufactures operating instructions	FLEX (Site)
	Determination of the vertical deformation and strength characteristics of soil by the plate loading test	BS 1377-9:1990	Z
	Calculation of equivalent CBR value using the plate bearing test	Design Manual for Roads and Bridges: Volume 7: pavement Design and maintenance - Foundation HD 25/94	Z

END of Flexible scope
