Flexible Scope

The laboratory is accredited to ISO/IEC17025:2017 for testing activities in accordance with the standards included in the area highlighted below. This may also include tests on the same or similar product types against standards, or customer-specified methods, that are not specifically listed in this Schedule, providing that:

- (1) The method or standard does not introduce new principles of measurement.
- (2) The method or standard does not require measurements to be made outside the parametric boundaries defined within the standard specifications already accredited and detailed within this Schedule of Accreditation.

Information about flexible scopes of accreditation is available in UKAS document GEN 4: 2019 and ILAC document G18:04/2010

Area covered by the flexible scope:

Toys & toys packaging (Physical/Mechanical, Flammability testing only)

Candle testing

Reinstatement of Non Toy methods stated on previous editions of this schedule (Issue 073 onwards)
