### DETAIL OF ACCREDITATION

| Materials/Products tested                                 | Type of test/Properties measured/Range of measurement           | Standard specifications/ Equipment/Techniques used   |
|---|---|--|
| WATERS, as specified                                      | <u>Microbiological Tests</u>                                    | Documented In-house Methods  |
| Raw (borehole), Process, Potable and Pools                | Enumeration:<br><i>E. coli</i> and Coliforms, MPN               | Method 2.9 based on The Microbiology of Drinking Water (2009), Part 4D using IDEXX Quantitray (Colilert)                   |
| Process, Potable and pool/spa water (excluding raw water) | <i>E. coli</i> and Coliforms                                    | Method 2.10 using membrane filtration technique on MLGA agar based on Microbiology of Drinking water method Part 4B (2009) |
| Process, Potable and pool/spa water (excluding raw water) | <i>Pseudomonas aeruginosa</i> , MPN                             | Method 12.7 by IDEXX Pseudalert  |
| Raw (borehole), Process, Potable and Pools                | Enterococci   | Method 11.2, based on The Microbiology of Drinking Water (2012), Part 5A   |
| Raw (borehole), Process, Potable and Pools                | <i>Pseudomonas aeruginosa</i>                                   | Method 12.5 using membrane filtration on CFC Agar incubated at 37°C for 48hr with confirmation using milk Cetrimide agar   |
| Raw (borehole), Process, Potable and Pools                | <i>Pseudomonas</i> spp  | Method 12.5 using membrane filtration on CFC Agar incubated at 25°C for 48hr with confirmation using oxidase reagent       |
| Raw (borehole), Process, Potable and Pools                | <i>Clostridium perfringens</i> and Sulphite Reducing Clostridia | Method 9.3, based on The Microbiology of Drinking Water (2010), Part 6   |
