Testing performed at the above address only

#### DETAIL OF ACCREDITATION

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
BODY FLUIDS AND TISSUES from animals as specified  Swabs, Tissue, Urine, Faeces, Skin Scrapings, Hair, Other Body Fluids	<u>Clinical Microbiological Tests</u>  Isolation and identification of bacteria of clinical significance and related opinions and interpretations	Documented In-House Methods supported by veterinary texts:  Methods using isolation culture media and biochemical characterisation tests: SOP 100 Ear microbiology SOP 101 Blood/Joint microbiology SOP 102 Eye microbiology SOP 103 Faeces microbiology SOP 104 Respiratory tract microbiology SOP 105 Skin microbiology SOP 106 Urine microbiology using microscopy and culture SOP 107 Venereal microbiology
Bacterial Isolates	Antibiotic sensitivity testing	SOP 110 Antimicrobial sensitivity testing
Swabs, Tissue, Hair, Body Fluids	Isolation and identification of yeasts and fungi of clinical significance	SOP 100 Ear microbiology SOP 105 Skin microbiology
Serum	Detection of <i>Aspergillus fumigatus</i> antibody	SOP 113 Immunodiffusion method using Microgen kit
Urine	<u>Urine Examination</u>  Biochemistry screen for pH, protein, glucose, ketone bodies, bilirubin and blood and related opinions and interpretations  Specific gravity and related opinions and interpretations	Documented In-House Methods:  SOP 112 using Roche-Combur 9 Test, dip stick method  SOP 118 by refractometer

1733  
Accredited to  
ISO/IEC 17025:2017

## Schedule of Accreditation

issued by

### United Kingdom Accreditation Service

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

### Nationwide Laboratory Services (Poulton) – a division of National Veterinary Services Limited

Issue No: 040 Issue date: 11 August 2020

Testing performed at main address only

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
BODY FLUIDS AND TISSUES from animals as specified (cont'd)	<u>Clinical Microbiological Tests</u> (cont'd)	Documented In-House Methods supported by veterinary texts:
Whole Blood with Anticoagulant (EDTA, heparin or sodium citrate), Blood Smears	<u>Haematology Tests</u>	
	Differential white blood cell count and related opinions and interpretations	SOP 114, Microscopic examination of a stained smear
	Assessment of red blood cell morphology and related opinions and interpretations	SOP 114, Microscopic examination of a stained smear
	Assessment of platelet numbers and morphology and related opinions and interpretations	SOP 114, Microscopic examination of a stained smear
	Enumeration of red and white blood cells and platelets and related opinions and interpretations Determination of haemoglobin concentration, MCV, MCHC, MCH and PCV/Haematocrit and related opinions and interpretations	SOP 154 using automated Advia 2120 analyser
	Manual Haematocrit	SOP 085 Micro-haematocrit centrifuge method
	Reticulocyte Count	SOP 084 Retic Chex Stain method
	Automated Reticulocyte count	SOP 155 using automated Advia 2120 analyser
	Automated Differential count	SOP 151 using automated Advia 2120 analyser
	One Step Prothrombin Time	SOP 001 Automated coagulation testing using Amelung Micro Coagulator
Activated Partial Thromboplastin Time	SOP 002 Automated coagulation testing using Amelung Micro Coagulator	

1733  
Accredited to  
ISO/IEC 17025:2017

## Schedule of Accreditation

issued by

### United Kingdom Accreditation Service

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

### Nationwide Laboratory Services (Poulton) – a division of National Veterinary Services Limited

Issue No: 040 Issue date: 11 August 2020

Testing performed at main address only

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
BODY FLUIDS AND TISSUES from animals as specified (cont'd)	<u>Parasitology Tests</u> and related opinions and interpretations	Documented In-House Methods supported by veterinary texts:
Faeces	Detection and/or Identification and Enumeration of helminths and protozoa of clinical significance	SOP 108 using microscopy techniques (Cryptosporidia screen using auramine phenol and confirmation by MZN)
Faeces	Detection and Identification of parasitic larvae	SOP 108 using Baerman method
Faeces	Enumeration of eggs and cysts, fluke ova and cysts	Documented In-House Methods supported by veterinary texts: SOP 108 using McMaster flotation
Skin Scrapings, Hair Samples	Identification of arthropods of clinical significance	SOP 109 using microscopy techniques
Blood, Serum, Plasma, Urine, as specified in individual SOPs	<u>Biochemistry Tests</u> and related opinions and interpretations	
	Biochemical analysis:	SOP 200 Beckman Coulter DxC700AU analyser and specific SOPs:
	Alanine Aminotransferase (ALT)	SOP 201
	Albumin	SOP 202
	Alkaline phosphatase (ALP)	SOP 203
	Alpha amylase	SOP 204
	Aspartate aminotransferase (AST)	SOP 205
	Bile acid	SOP 206
	Bilirubin - direct	SOP 207
	Bilirubin - total	SOP 208
	Calcium	SOP 209
	Cholesterol	SOP 210
	Creatinine	SOP 211

1733  
Accredited to  
ISO/IEC 17025:2017

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

### Nationwide Laboratory Services (Poulton) – a division of National Veterinary Services Limited

Issue No: 040 Issue date: 11 August 2020

Testing performed at main address only

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
BODY FLUIDS AND TISSUES from animals as specified (cont'd)	<u>Biochemistry Tests</u> and related opinions and interpretations (cont'd)	Documented In-House Methods supported by veterinary texts:
Blood, Serum, Plasma, Urine, as specified in individual SOPs (cont'd)	Biochemical analysis: (cont'd)	SOP 200 Beckman Coulter DxC700AU analyser and specific SOPs: (cont'd)
	Creatinine Kinase (CK NAC)	SOP 212
	Fructosamine	SOP 214
	Gamma-glutamyl transpeptidase (GGT)	SOP 215
	Glucose	SOP 216
	Glutamate dehydrogenase (GLDH)	SOP 217
	Lactate dehydrogenase (LDH)	SOP 218
	Lipase	SOP 219
	Magnesium	SOP 220
	Phenobarbital	SOP 222
	Phosphorus (inorganic phosphate)	SOP 223
	Total protein	SOP 225
	Triglycerides	SOP 227
	Urea	SOP 228
	Uric acid	SOP 229
Blood, Serum, Plasma, Urine	Electrolyte determination: Chloride, Potassium and Sodium	SOP 213
CSF, Urine	Total protein pyrogallol red	SOP 226
Serum, Plasma	Hormone assays:	SOPs using chemiluminescent method using Immulite 2000:
	Canine TSH	SOP 98
	Cortisol	SOP 117

1733  
Accredited to  
ISO/IEC 17025:2017

## Schedule of Accreditation

issued by

### United Kingdom Accreditation Service

2 Pine Trees, Chertsey Lane, Staines-upon-Thames, TW18 3HR, UK

### Nationwide Laboratory Services (Poulton) – a division of National Veterinary Services Limited

Issue No: 040 Issue date: 11 August 2020

Testing performed at main address only

Materials/Products tested	Type of test/Properties measured/Range of measurement	Standard specifications/ Equipment/Techniques used
BODY FLUIDS AND TISSUES from animals as specified (cont'd)	<u>Biochemistry Tests</u> and related opinions and interpretations (cont'd)	Documented In-House Methods supported by veterinary texts:
Blood, Serum, Plasma, Urine	Proteins	SOP 24 using cellulose acetate membrane electrophoresis
	Therapeutic drug monitoring: Digoxin	SOP 99 using automated chemiluminescent method using Immulite 2000
Serum, Plasma	Progesterone	SOP 124 Automated Chemiluminescent method using Immulite 2000
Serum, Plasma	Canine/Feline Thyroxine (T4)	SOP 003 Automated Chemiluminescent method using Immulite 2000
FOODS	<u>Microbiological Tests</u>	
	Detection of:	
	<i>Listeria</i> spp including species identification	In-House Method SM 28 using Fraser broth enrichment and selective plating using ALOA Agar and Palcam Agar with confirmation using API
	<i>Salmonella</i> spp	Method SM 05 based on BS EN ISO 6579-1:2017
	Enumeration of:	
	<i>Bacillus cereus</i> (presumptive)	Method SM 11 based on BS EN ISO 7932:2004
	Coliforms (presumptive)	Method SM 02 based on BS ISO 4832:2006
	<i>Clostridium perfringens</i> and sulphite reducing bacteria	Method SM 29 based on BS EN ISO 7937:2004
	Enterobacteriaceae	Documented in house Method SM 10 using VRBGA and confirmation using Glucose Agar

1733  
Accredited to  
ISO/IEC 17025:2017
