DETAIL OF ACCREDITATION

Materials/Products	Scheme Name/Type of Test/Properties Measured	Scheme Protocols/Procedures/ Techniques Used
Whole blood, Red cells in Alsever's Plasma/serum	Blood Transfusion Laboratory Practice (also known as UK NEQAS BTLP): Pre-Transfusion Testing ABO/D grouping Antibody screening Antibody identification Cross-matching Red cell phenotyping	Details of the scheme are documented on the website
Red cells in Alsever's	Direct Antibody Testing (DAT)	Details of the scheme are documented on the website
Whole blood, Red cells in Alsever's Plasma/serum	ABO titration scheme determination of titre	Details of the scheme are documented on the website
Whole blood, Plasma, Cord red cells	Estimation of FMH	Details of the scheme are documented on the website
Human whole blood in CPD anticoagulant, manipulated with addition/removal of plasma, buffy coat residues and platelet concentrates, partially stabilised	General Haematology (also known as UK NEQAS Haematology): Full Blood Count: Haemoglobin concentration Total white blood cell count Red blood cell count Haematocrit Mean cell volume Mean cell haemoglobin Mean cell haemoglobin concentration Platelet count	Details of the scheme are documented on the website

Accredited to
ISO/IEC 17043:2010
